

ISSUE #2.5 [JUNE 22, 2022]

For at least 5 hours today I was napping, and instead of feeling well-rested I woke up sweaty and my eyes were hot like they'd been left out in the sun.

Planning to do the same thing tomorrow.

**Ready to learn
chemistry.**

I guess that wasn't real
then. Great.

**Go shove it, I'm
trying to sleep.**

**Maybe it'd be better
if I just thought
about everything
that's happened the
past 10 years.**

Rise and shine.
